CONTROL AND PROTECTION OF NUCLEAR INSTALLATIONS

Atech operates in projects for control and protection systems of nuclear installations throughout their entire life cycle, from the conceptual phase to the development of both basic and detailed projects. In the subsequent phases, we provide solutions for process control and reactor protection systems, in addition to assembly, testing, integration, and commissioning.

The company also promotes operator training, supports licensing with competent bodies, and provides identification and management of global supply chains, efficiently conducting all phases of the logistical operation.
